22498	<i>Phyllergates</i>	<i>Phyllergates</i>	<i>Phyllergates</i>	<i>Phyllergates</i>	<i>Phyllergates</i>	Sharpe, 1883			PHY	Mountain Tailorbird and Rufous-headed Tailorbird are not related to <i>Orthotomus</i> (Cisticolidae); assigned instead to <i>Phyllergates</i> [Cettiidae] (Alström et al. 2006; Ryan et al. 2006; Nguembock et al. 2007). Revert spelling of species epithet to the emended <i>cucullatus</i> . The original spelling with one "l" is an incorrect spelling of the Latin word with two "l" s"intended to mean "hooded"as per the French vernacular name in the original description "Orthotome Chaperonné." Not the Latin word meaning cuckoo-like spelled with one "l". (Dickinson & Christidis 2014; HBW).

Recognition of ssp. proposed by Rasmussen & Anderton (2012); but Olsson et al. (2005) argued for synonymizing *kashmirensis* with *reguloides* based on mtDNA and morphology.

Phylloscopus claudiae is split from *P. reguloides* (Olsson et al. 2005; Rheindt 2006; BLI).
Phylloscopus goodsoni is split from *P. reguloides* (Olsson et al. 2005; Rheindt 2006; BLI).

Phylloscopus ogilviegranti is split from *P. davisoni* (Olsson et al. 2005; Päckert et al. 2009; Alström et al. 2018).

Change (8.2) English name of *Phylloscopus davisoni* from White-tailed Leaf Warbler to Davison's Leaf Warbler (Rheindt 2006; BLI). Change species epithet of Davison's Leaf Warbler from *P. davisoni* to *P. intensior* with the move of the latter subspecies to Davison's Leaf Warbler (del Hoyo & Collar 2016; Alström et al. 2018).

Subspecies epithet *muleyitensis* is a *nom. nov.* to replace the epithet *davisoni* which is preoccupied by *Phylloscopus montis davisoni* (Dickinson & Christidis 2014).

Move subspecies *intensior* from Kloss's Leaf Warbler to Davison's Leaf Warbler (Clement & Christie 2018).

27093 <i>Turdus poliocephalus</i>	<i>Turdus poliocephalus</i>	Ødrossel	Südseedrossel	Island Thrush	Latham, 1801	OR, AU, PO : Sumatra and Philippines (except Palawan group, East Visayas and Sulu Arch.) to Fiji (sw Polynesia) and Samoa (sc Polynesia)		TAX	With approximately 50 named subspecies, Island Thrush (as currently treated) is the most taxon-dense species in Aves. It surely must represent a species complex rather than a single polytypic species. A comprehensive study of the geographic variation in coloration patterns and morphometric variables suggests that over thirty species may be involved (Peterson 2007). However, taxonomic revision of this complex still awaits a comprehensive vocal, ecological and phylogenetic analysis.

30502 <i>Magumma</i>	<i>Magumma</i>	<i>Magumma</i>	<i>Magumma</i>	<i>Magumma</i>	Mathews, 1925				
30503 <i>Magumma parva</i>	<i>Magumma parva</i>	Anianiau	Gelbkleidervogel	Anianiau	(Stejneger, 1887)	PO : Hawaiian Is.		TAX	<i>Hemignathus parvus</i> is assigned to the monotypic genus <i>Magumma</i> (AOU 2008).
30504 <i>Loxops</i>	<i>Loxops</i>	<i>Loxops</i>	<i>Loxops</i>	<i>Loxops</i>	Cabanis, 1847				
30505 <i>Loxops mana</i>	<i>Loxops mana</i>	Hawaii Klatrefinke	Mana-Akepakleidervogel	Hawaii Creeper	(Wilson, SB, 1891)	PO : Hawaiian Is.		PHY, TAX	Hawaii Creeper is genetically closer to amakihis/akepas than to <i>Oreomystis bairdi</i> (Pratt 2009; Reding et al. 2009). Include in <i>Loxops</i> rather than separate to <i>Manucerthia</i> (NACC 2015-B-3b).
30506 <i>Loxops caeruleirostris</i>	<i>Loxops caeruleirostris</i>	Akekee	Kauai-Akepakleidervogel	Akekee	(Wilson, SB, 1890)	PO : Hawaiian Is.			
30507 <i>Loxops coccineus</i>	<i>Loxops coccineus</i>	Akepa	Hawaii-Akepakleidervogel	Hawaii Akepa	(Gmelin, JF, 1789)	PO : Hawaii (Hawaiian Is.)		AS, ENG	Island populations of the Akepa are recognized as separate species (NACC 2015-B-4c); add island name (Hawaii) to Akepa.
30508 <i>Loxops wolstenholmei</i>	<i>Loxops wolstenholmei</i> †	Oahu-akepa	Oahu-Akepakleidervogel	Oahu Akepa	Rothschild, 1893	PO : Oahu (Hawaiian Is.)		AS	
30509 <i>Loxops ochraceus</i>	<i>Loxops ochraceus</i>	Maui-akepa	Maui-Akepakleidervogel	Maui Akepa	Rothschild, 1893	PO : Maui (Hawaiian Is.)		AS	
30510 <i>Chlorodrepanis</i>	<i>Chlorodrepanis</i>	<i>Chlorodrepanis</i>	<i>Chlorodrepanis</i>	<i>Chlorodrepanis</i>	Perkins, 1899			TAX, PHY	Previously in <i>Hemignathus</i> , 3 species of Amakihi (<i>virens</i> , <i>flava</i> , <i>stejnegeri</i>) are assigned to <i>Chlorodrepanis</i> based on Lerner et al. (2011) phylogeny; see also Pratt (2005).
30511 <i>Chlorodrepanis virens</i>	<i>Chlorodrepanis virens</i>	Amakihi	Hawaii-Amakihikleidervogel	Hawaii Amakihi	(Gmelin, JF, 1788)	PO : Hawaiian Is.			
30512 <i>C. v. wilsoni</i>	<i>Chlorodrepanis virens wilsoni</i>	Maui Amakihi	Amakihikleidervogel		(Rothschild, 1893)	Molokai, Lanai and Maui			
30513 <i>C. v. virens</i>	<i>Chlorodrepanis virens virens</i>	Amakihi	Amakihikleidervogel		(Gmelin, JF, 1788)	Hawaii			
30514 <i>Chlorodrepanis flava</i>	<i>Chlorodrepanis flava</i>	Oahu-amakihi	Oahu-Amakihikleidervogel	Oahu Amakihi	(Bloxam, A, 1827)	PO : Hawaiian Is.			
									<i>H. kauaiensis</i> was a name proposed by Doug Pratt because when Kauai Amakihi is placed in <i>Hemignathus</i> , its original name, <i>stejnegeri</i> , is preoccupied by a subspecies of Greater Akialoa. That conflict no longer exists with placement of Kauai Amakihi in <i>Chlorodrepanis</i> and Greater Akialoa in <i>Akialoa</i> , so the older name is restored.
30515 <i>Chlorodrepanis stejnegeri</i>	<i>Chlorodrepanis stejnegeri</i>	Kauai Amakihi	Kauai-Amakihikleidervogel	Kauai Amakihi	(Wilson, SB, 1890)	PO : Hawaiian Is.		TAX, PHY	Previously in <i>Carpodacus</i> , Purple Finch, Cassin's Finch and House Finch are assigned to <i>Haemorhous</i> (Zuccon et al. 2012; AOU 2012).
30516 <i>Haemorhous</i>	<i>Haemorhous</i>	<i>Haemorhous</i>	<i>Haemorhous</i>	<i>Haemorhous</i>	Swainson, 1837			TAX, PHY

										Unsettled generic placement. Mourning Sierra Finch is placed in the resurrected, monospecific genus <i>Rhopospina</i> Cabanis, 1851 by Burns et al. (2016) which is followed here, as in Clements. Dickinson & Christidis (2014) include it in a more expansive <i>Rhopospina</i> including the three species treated here as belonging to <i>Porphyrospiza</i> . SACC (730-1) currently retains it in <i>Phrygilus contra</i> the phylogeny of Burns et al. (2014) but "proposal badly needed." Note gender.
